

## **Capital Park Family Health Center to Celebrate Grand Opening**

**WHEN:** October 19, 2011  
11:30 AM to 1:30 PM

**WHERE:** Capital Park Family Health Center  
2365 Innis Road  
Columbus, OH 43224

Please join us for the Grand Opening of the new Capital Park Family Health Center. The new 17,500 sq. ft. facility replaces the original health center located at 2150 Agler Road, less than a mile from the new facility site.

Speakers at the event include: Senator Charleta Tavares; District Director Mark Bell from U.S. Congressman Pat Tiberi's office; Ed Roberts from Senator Sherrod Brown's office; Columbus Health Commissioner Dr. Teresa Long; and Ohio Association of Community Health Centers' CEO Randy Runyon.

There will be a ribbon cutting ceremony and health center tours. Free health screenings and health education will be available.

The \$4.4 million construction project was made possible by economic stimulus funding from the Department of Health and Human Services. Heart of Ohio Family Health Centers was one of only 85 applicants to be awarded Facility Investment Program (FIP) stimulus funding out of 600 applications nationwide.

The new Capital Park Family Health Center increases primary care services for all individuals, infants through seniors. In addition to primary care, we provide OB/GYN services, limited pharmacy services, behavioral health, and, in the future, dental services.

The new facility expands health services for the entire community and enables Heart of Ohio Family Health Centers to serve an additional 3,175 patients annually. It helps to improve operational efficiency and enhances quality of care by increasing from six to 17 medical exam rooms.

This increased access will mean more community residents are able to find a medical home instead of using hospital emergency services for their routine medical needs.

The new Capital Park Family Health Center has been carefully designed to pursue LEED certification upon completion. The process to achieve this prestigious and advanced rating includes integrating advanced green/sustainable design features targeting energy and water efficiency coupled with pollution mitigation. In addition to an energy efficient structural shell, the building will include an on-site recycling center.

Heart of Ohio Family Health Centers operates two federally qualified health centers in central Ohio: Capital Park Family Health Center and Whitehall Family Health Center.
